Re: VA Paving Response to City's Letter (November 11, 2008)

Dear Mr. Luzier:

Thank you for submitting your letter dated November 25, 2008 (Attachment 1) to address all of the issues that were raised in the City's letter to VA Paving dated November 11, 2008 (Attachment 2). These issues identified by the City seeking VA paving response were related to:

- Maintenance of Hotline
- Responsiveness to complaints and thoroughness of the response
- Operational and maintenance issues

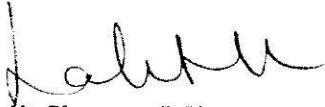

We have reviewed VA Paving's response and find it is responsive to the issues identified in our letter. Your letter provides specific measures to address each of the issues. The City asks that VA Paving immediately execute the proposed strategies in a comprehensive manner. Your cooperation and effort are greatly appreciated and will help address the community's concerns.

Additionally, at the last Virginia Paving Community Liaison Committee meeting, some of the community members expressed desire of advance notification to the citizens of surrounding community of any foreseeable changes in operation at the plant. The City feels that it is appropriate to notify the members of the liaison committee and the City staff of such changes in advance, and ask that you formalize this in your internal notification protocols.

Should you have any questions, please don't hesitate to contact the undersigned individuals.

Sincerely,

Richard Josephson
Deputy Director, Planning and Zoning
